PROFESSIONAL SUMMARY

AI Engineer with 3.8+ years building production agentic AI systems with LangChain— developing multi-agent systems, RAG pipelines, and document intelligence systems. Skilled in prompt engineering (structured outputs, ReAct, chain-of-thought, few-shot), LLM application evaluation (RAGAS), and integrating LLM applications with enterprise REST APIs and vector databases.

SKILLS

Agentic AI & Orchestration: LangChain, LangGraph, LlamaIndex, CrewAI, Multi-Agent Frameworks, MCP, Agent Memory, Context Engineering, Prompting Techniques, ADK

LLM, Prompting & Evaluation: Azure OpenAI, Gemini, HuggingFace Transformers, Open-Source LLMs (Qwen, Llama3, Mixtral), Ollama, Multimodal LLMs, Chain-of-Thought, ReAct, LangSmith, RAGAS, LLM Evaluations, NLP, Tokenization, FineTuning LoRA and QLoRA

RAG & Vector Databases: Embeddings, Chunking Strategies, Hybrid Search, Reranking (Cohere), PgVector, FAISS, Supabase

Tools & Frameworks: Python, FastAPI, NumPy, Pydantic, PostgreSQL, MongoDB, MySQL, Redis, FastMCP, Streamlit

Cloud & DevOps: Docker, AWS (EC2, S3, Bedrock, Lambda), Google Cloud (Vertex AI, Document AI, Cloud Vision), Git/GitHub, CI/CD, Postman, OpenTelemetry, REST APIs, Docker, Kubernetes

Other Tools & Languages: Java, SQL, n8n, make.com, Zapier, VS Code, Google Antigravity, Cursor

PROFESSIONAL EXPERIENCE

Associate Engineer 2 | AI Automation – Bassetti India, Kolkata, India | Jul 2024 – Present

Tech Stack: LangChain, LangGraph, FastMCP, AWS Bedrock, Gemini, Azure OpenAI, MongoDB, PgVector, Pydantic, Vertex AI, REST APIs, Docker, JWT

- Built production-grade **multi-agent conversational chatbot** with LLM orchestration, function calling, and tool-based execution; implemented persistent conversational memory using Redis caching, cutting average response latency.
- Built **RAG** based agent to answer user queries from multiple documents sources, applied FAISS indexing, chunking strategies and Cohere reranking to improve retrieval quality.
- Designed an MCP-based backend using **FastAPI** and **FastMCP**, integrating an MCP client with an AI agent to process and route user requests to the appropriate tools and enterprise systems.
- Implemented secure **JWT token generation and propagation** from an Enterprise API through the MCP client to the MCP server, enabling authenticated, access-controlled tool execution across agent workflows.
- Evaluated LLM application quality using **RAGAS** and custom evaluation harnesses to measure retrieval relevance and response groundedness, optimize prompts and retrieval pipelines.
- Implemented **token usage and latency tracking** for the agent — logging input/output token counts and response time per request — enabling real-time cost monitoring and performance analysis across agent interactions.
- Built automated document (PDF, images) extraction pipelines combining OCR and document-extractions, converting unstructured enterprise data into structured content; processed **30** documents/month at **95%** extraction accuracy, cutting manual data-entry effort by **90%**.
- Worked with DevOps team to resolve CI/CD pipelines, logging and tracing production failures..
- Automated business workflows (CRM/website data collection for Marketing & Sales, meeting scheduling for HR) using n8n, Make.com, and Zapier, automating **10** manual processes and saving the teams roughly **15** hours/week.

Associate Engineer | Jr. Java Developer – Bassetti India, Kolkata, India | Dec 2022 – Jun 2024

Tech Stack: Java, Spring Boot, Hibernate, PostgreSQL, Apache Tomcat, REST APIs, GitHub

- Developed and maintained a Java-based full-stack application; integrated third-party REST APIs, debugged production-level issues, and implemented code optimizations that improved application response time.
- Conducted code reviews, enforced engineering best practices (Git-based version control, JUnit testing), managed deployments on Apache Server, and enhanced LDAP authentication for secure access control.

EDUCATION

B.Tech – Rawal Institute of Engineering & Technology | Aug 2018 – Jun 2022

GPA: 8.034 / 10.0

ACHIEVEMENTS & INTERESTS

- Employee of the Quarter – Oct'25–Dec'25
- Employee of the Month – Jul'25

Interests: Sports, Chess, Reading, Coding
